

# Standard Operating Procedure

## Smart DMS Document Management Portal

Step-by-step user guide with live application screenshots

| Document Field | Details                                                     |
|----------------|-------------------------------------------------------------|
| Application    | Smart DMS v2.0 - Document Management Portal                 |
| Organization   | ZF Rane Automotive India Private Limited                    |
| Audience       | Users, approvers, managers, supervisors, and administrators |
| Prepared On    | 29 June 2026                                                |
| File Name      | SOP.pdf                                                     |

Figure 1: Smart DMS sign-in screen.

# 1. Purpose And Scope

- Explain how to access and use the Smart DMS portal for document upload, approval, tracking, library browsing, and audit review.
- Provide a consistent step-by-step guide for daily users and high-level users.
- Support onboarding and refresher training with screenshots from the actual application.

This SOP applies to all users who submit, review, approve, view, or maintain documents in Smart DMS.

# 2. Roles And Access

| Role                 | Typical Access                                                                                        |
|----------------------|-------------------------------------------------------------------------------------------------------|
| User                 | Upload documents, view allowed documents, update profile, and track own activity.                     |
| Approver             | Review pending documents, approve or reject submissions, and view approval tracking.                  |
| Manager / Supervisor | Broader department or plant visibility, review queues, tracking, archive access where enabled.        |
| Admin                | Full access including dashboard, approvals, archive, system log, people list, and document libraries. |

## 3. Login And First Access

1. Open the Smart DMS portal URL in a browser.
2. Enter your GENID or registered email address.
3. Enter your password.
4. Select Sign in. On successful login, the dashboard opens.
5. Use Forgot password only when you cannot access your account.

### Industry 4.0 Document Control

Secure, traceable document management for your manufacturing plants and customer records.

The sign-in page for the Smart DMS portal. It features a light blue background. At the top right is a small circular icon. The main heading is "Sign in" in bold. Below it is the instruction "Enter your credentials to access the portal." There are two input fields: "GENID or Email" with a placeholder "e.g. EMP001 or you@example.com" and "Password" with a placeholder "\*\*\*\*\*". Below the password field is a checkbox labeled "Show password" and a link "Forgot password?". A blue "Sign in" button is centered. Below the button is a link "New here?" and a "Create an account" button. At the bottom, there is a demo user list: "Demo: d1va@example.com // Pass@12345 | admin L3 | 12user@example.com // L3@12345 | 13user@example.com // L3@12345 | 14user@example.com // L4@12345".

Figure 2: Users can sign in with GENID or email.

## 4. Dashboard Overview

The dashboard is the main landing page. It summarizes document counts, recent activity, approval status, filters, and quick actions.

- Use filters to search by file, uploader, plant, department, customer, status, document number, revision number, or date.
- Use quick actions to upload, review pending items, open the library, or check reports.
- Open a document from the table to see details and preview.

Figure 3: Dashboard with KPIs, filters, and document table.

## 5. Upload A Document

1. Open Upload Documents from the sidebar.
2. Drag and drop files or use browse files. Accepted file types are PDF, Word, Excel, and PowerPoint.
3. Enter a document number. Enter a revision number if this is a revised document.
4. Confirm plant and department. Select a customer, or mark the file as Internal Document.
5. Select the document library category and required folder or subfolder.
6. Optional: enable revision change summary and describe what changed.
7. Select Submit for Approval. The file is stored and routed to approvers.

### Upload Documents

Upload documents to the Document Library. Every file is submitted for approval.

**Select your file(s)**  
Drag and drop or click to browse. PDF, Word, Excel, PowerPoint – max 100 MB each. All uploads go to the Document Library and require approval.

Drop files here or browse files

Accepted: pdf - docx - xls - pptx - doc - xls - ppt

**Document details and library path**  
Select the exact Document Library folder. Every upload is sent for approval.

Divya Chandra EHR001 P1 - Trichy Plant QAD - Quality Assurance Department

Document Number  
DOC-2026-001

Revision Number (optional)  
Rev.00

Plant  
P1 - Trichy Plant

Department  
QAD - Quality Assurance Department

Customer  
Select customer

This is an Internal Document – no customer required

**Document Library path**  
Choose the exact folder where this upload should be saved. The selected path updates live here.

QMS / Select folder

Only the library fields shown for the selected category are required.

Category  
QMS

**What happens next?**

- File is stored**  
Your document is saved with all metadata attached.
- Approver is notified**  
An email with a review link is sent to the approver.
- Status updates**  
You'll see Pending → Approved or Rejected in the dashboard.

**Tips**

- Use a consistent document number format, e.g. DOC-2026-001
- Select the correct customer so filtering works later.
- Group related files in one submission when possible.
- For internal memos or reports, tick "Internal Document".

Figure 4: Upload screen with metadata and library path selection.

## Upload Rules

- Do not upload duplicate files unless the revision number or change summary explains the update.
- Use consistent document numbering, for example DOC-2026-001.
- Select the correct customer and library path so the file appears in the right folder later.

## 6. Review And Approve Documents

1. Open Pending Items from the sidebar.
2. Use status filters or search to find the document.
3. Select Review.
4. Check document metadata, preview, uploader, plant, department, customer, revision number, and comments.
5. Choose Approve when the document is acceptable.
6. Choose Reject only when changes are required, and add a clear rejection comment.

The screenshot shows the 'Pending Items' page in the Smart DMS Portal. The page has a sidebar on the left with navigation options like Dashboard, Upload Documents, Pending Items, Track Approvals, Document Library, Reports, Revision History, Account, Profile, About DMS, and About Company. The main content area is titled 'APPROVAL QUEUE' and 'Pending Items'. It shows a live approval queue with 0 pending, 58 approved, and 10 rejected items. Below this is a search bar and a table of approval records. The table has columns for DATE, FILE, PLANT, DEPARTMENT, CUSTOMER, STATUS, and REVIEW. The records show various documents in different stages of approval, with some marked as 'TICKY Plant' or 'Isobutylene Plant'.

| DATE       | FILE                                               | PLANT                  | DEPARTMENT                            | CUSTOMER                  | STATUS   | REVIEW |
|------------|----------------------------------------------------|------------------------|---------------------------------------|---------------------------|----------|--------|
| 2024-06-25 | Digitalization_SOP_27-2_customer_scam_land         | PS - Ticky Plant       | QAD - Quality Assurance Department    | TML - Tata Motors Limited | APPROVED | Review |
| 2024-06-18 | Activity_Based_LEAST_001 - Rev 00 - master_record  | PS - Isobutylene Plant | MFG HT - Manufacturing Heat Treatment | Internal                  | REJECTED | Review |

| 2024-06-06 | Activity_Based_LEAST_003 - Rev 00 -                | PS - Isobutylene Plant | MFG HT - Manufacturing Heat Treatment | Internal                  | APPROVED | Review |
| 2024-06-05 | Acceptance_Letter_1 word - 2                       | PS - Ticky Plant       | QAD - Quality Assurance Department    | Internal                  | APPROVED | Review |
| 2024-06-05 | Acceptance_Letter_1 word - 02                      | PS - Ticky Plant       | QAD - Quality Assurance Department    | Internal                  | APPROVED | Review |
| 2024-06-05 | Internship_report_1 word - 01                      | PS - Ticky Plant       | QAD - Quality Assurance Department    | Internal                  | APPROVED | Review |

Figure 5: Pending Items page for approval queue management.

The screenshot shows the 'Review' screen for a document titled 'Digitalization\_SOP\_rev1\_20260626170147.pptx'. The document is in the 'APPROVAL REQUEST' state. The main area shows a preview of the document, which is currently blank. The right sidebar contains document details: Document Number (37), Revision Number (2), Category (customer\_scam\_land), Uploaded By (Dina Chandra (U001)), Plant (PS - Ticky Plant), Department (QAD - Quality Assurance Department), Customer (TML - Tata Motors Limited), Uploaded On (2024-06-25), Current Status (Approved), Updated At (2024-06-26 17:01:56), Rejection Comments (No rejection comments yet), and Decision (This request has already been reviewed).

Figure 6: Review screen used before approving or rejecting.

## 7. Track Approval Status

1. Open Track Approvals.
2. Use Mine or All depending on your access level.
3. Filter by status or search for a file.
4. Read the stepper to understand where the document is in the approval workflow.
5. Follow up with the pending actor if a document is delayed.

Figure 7: Approval tracking with status stepper and document history.

## 8. Browse The Document Library

1. Open Document Library.
2. Choose a top category from the tab bar.
3. Follow the on-screen folder flow to select category, folder, customer, plant, or department.
4. Select View on a document to open its detail or preview page when the file exists in uploads.

Figure 8: Document Library category tabs and folder browser.

## 9. Master Records And Customer Records

1. Open Master Records to browse plant-based folders.
2. Select a plant, then select a department folder.
3. Open a listed file to view it, if it is available in the uploaded document store.
4. Open Customer Records to browse documents grouped by customer.
5. Select a customer card and review the available file list.

Figure 9: Master Records with plant and department folders.

Figure 10: Customer Records with customer-specific document files.

# 10. Revision History, Archive, And System Log

- Revision History shows document revisions, revised by, revision date, and change summary.
- Archive stores deleted or retired records for audit reference where your role permits access.
- System Log records user actions such as login, upload, view, approve, reject, archive, and profile changes.
- Use these pages during audits, troubleshooting, or document control reviews.

Figure 11: Revision History page for controlled document changes.

Figure 12: System Log page for audit trail review.

## 11. Profile And Account Maintenance

1. Open Profile from the sidebar or user chip.
2. Review your name, email, employee ID, plant, department, role, and activity.
3. Upload or change profile photo if needed.
4. Change your password periodically or whenever account security is a concern.
5. Use Sign out when you finish your session, especially on shared systems.

Figure 13: Profile page for account information and password updates.

## 12. About And Reference Information

The About Company page provides company, plant, customer, certification, award, and process reference information.

Figure 14: About Company page with organization reference information.

## 13. Best Practices

- Check document number, revision number, plant, department, and customer before submitting.
- Use Internal Document only for files that do not belong to a customer.
- Write rejection comments that explain exactly what must be corrected.
- Use search and filters before uploading a revised file to avoid duplicates.
- Review Revision History and System Log during audits or investigations.
- Sign out at the end of each session.

## 14. Troubleshooting

| Issue                      | Action                                                                                       |
|----------------------------|----------------------------------------------------------------------------------------------|
| Cannot log in              | Verify GENID/email and password. Use Forgot password or contact the administrator.           |
| Submit button disabled     | Select at least one valid file and complete required metadata and library path.              |
| Customer field required    | Select a customer or enable Internal Document if the file is not customer-specific.          |
| File not visible in folder | Confirm it was uploaded to the correct category, plant, department, customer, or folder.     |
| Approval not moving        | Open Track Approvals and identify the pending approval step or actor.                        |
| Preview not available      | The physical file may not exist in uploads or the file type may not support browser preview. |

## 15. Change Control

Update this SOP whenever navigation, upload rules, approval workflow, role access, document categories, or audit procedures change.
