

Smart DMS User Manual

Guide for end users of the document management portal

1. Login and Access

- Open the app in your browser using the provided URL.
- Sign in with your email or employee ID and password.
- If you forgot your password, use the Forgot Password option to reset it.
- After login, you will be taken to the dashboard.

2. Dashboard Overview

- The dashboard shows all documents available to you.
- Use the search box and filters to find documents quickly.
- You can view the status of each document such as Approved, Pending, or Rejected.
- Use the star icon to bookmark documents you use often.

3. Uploading Documents

- Go to the Upload page and choose the relevant category and folder path.
- Select the document file and enter the required details.
- Submit the document to send it for review and approval.

4. Reviewing and Approving

- Approvers can open pending items from the approval queue.
- Review the document, check the metadata, and approve or reject it.
- Approved items move forward, while rejected items are returned for correction.

5. Document Library

- The document library helps you browse documents by category and folder.
- Use it to locate documents without searching the full dashboard. You can open documents directly from the library view.

6. Revision History and Archive

- Use Revision History to track changes made to a document over time.
- Archive is used to view documents that have been moved out of active use.

7. Best Practices

- Use clear file names and complete document details.
- Check the correct category and plant before uploading.
- Contact your administrator if you cannot access a document or feature.

Support

For login issues, document access problems, or approval questions, contact the DMS administrator or your team lead.
