

Standard Operating Procedure

Smart DMS Document Management Portal

Detailed page-by-page and section-by-section user guide

Document Field	Details
Application	Smart DMS v2.0
Organization	ZF Rane Automotive India Private Limited
Audience	Users, Approvers, Managers, Supervisors, and Administrators
Prepared On	29 June 2026
File Name	SOP.pdf

Smart DMS dashboard overview.

1. Purpose

This SOP explains how to access and operate every major page of the Smart DMS application. It is designed as a practical training guide for daily users and as a reference for approvers and administrators.

2. Scope

This guide covers sign in, registration, dashboard use, uploads, approvals, approval tracking, document library browsing, master records, customer records, reports, revision history, archive, system logs, people, profile, notifications, and about pages.

3. Role Summary

Role	Typical Responsibilities
User	Upload documents, track submissions, browse permitted records, manage own profile.
Approver	Review pending documents and approve or reject with comments.
Manager / Supervisor	Review team records, track status, and access broader document functions.
Admin	Access all operational pages including archive, system log, people, approvals, and audit data.

4. General Navigation

- Use the left sidebar to switch between Dashboard, Upload Documents, Pending Items, Track Approvals, Document Library, Reports, System, Account, and About pages.
- Use the top bar to access notifications, theme toggle, profile, and sign out.
- Use filters and search fields before opening or uploading files to avoid duplicates.
- Use page-size controls and pagination on table pages when records span multiple pages.

Notification panel opened from the dashboard top bar.

5. Login Page

A screenshot of the SmartDMS login page. The page has a light blue background. At the top left is the SmartDMS logo. The main heading is "Sign in" in bold. Below it is the instruction "Enter your credentials to access the portal." There are two input fields: "GENID or Email" with a placeholder "e.g. EMP001 or you@example.com" and "Password" with a placeholder "*****". Below the password field is a checkbox labeled "Show password" and a link "Forgot password?". There is a blue "Sign in" button. Below the button is a link "New here?". At the bottom is a "Create an account" button. At the very bottom, there is a demo user information section: "Demo: dmsa@example.com / Pass\$12345 (Admin: 123)" and "12user@example.com / 12812345 | 12user@example.com / 12812345 | 12user@example.com / 12812345".

Screenshot: 5. Login Page

Purpose

Allows registered users to enter the Smart DMS portal using GENID or email and password.

Page Sections

- Brand panel - identifies Smart DMS and the document control purpose.
- Sign-in form - accepts GENID/email and password.
- Show password - helps verify password entry before sign in.
- Forgot password - opens the reset password request flow.
- Create an account - opens the registration page.

How To Use This Page

1. Open the portal URL.
2. Enter GENID or registered email.
3. Enter password and optionally use Show password.
4. Select Sign in.
5. If authentication succeeds, review the dashboard.

Important Notes

- Do not share credentials. Always sign out on shared systems.

6. Register Page

Join the Smart DMS Portal

Create your account to access manufacturing documents, plant assets, and customer records.

Create account

Fill in the details below to register.

Full name
Your full name

Employee ID
e.g., EHP001

Plant
Select plant

Department
Select department

Email address
you@example.com

Password
Min. 8 characters
☐ Show password

Confirm password
Repeat password
☐ Show password

New registrations are created with standard uploader access. Higher-level access is managed separately.

[Create account](#)

[Already registered?](#)

[Back to sign in](#)

Screenshot: 6. Register Page

Purpose

Allows a new user to create an account with employee, plant, department, email, and password details.

Page Sections

- Full name and employee ID - identifies the user.
- Plant and department - controls organizational context.
- Email - used for login and notifications.
- Password fields - create the initial password.
- Back to sign in - returns to the login page.

How To Use This Page

1. Open Create an account from the login screen.
2. Enter name, employee ID, plant, and department.
3. Enter a unique email address.
4. Create and confirm the password.
5. Submit registration and wait for approval or role updates if needed.

Important Notes

- New accounts are standard User accounts unless an administrator assigns a higher role.

7. Dashboard Page

Screenshot: 7. Dashboard Page

Purpose

Provides the main operational overview for documents, approvals, recent views, filters, and quick actions.

Page Sections

- KPI cards - show visible records, pending, approved, and rejected counts.
- Quick actions - jump to upload, pending items, document library, or graphics report.
- Recently viewed - reopens documents accessed recently.
- Filters - search by text and filter by plant, department, and customer.
- Documents table - lists records with file, uploader, plant, department, customer, status, and actions.

How To Use This Page

1. Review KPI cards to understand current workload.
2. Use quick actions for common tasks.
3. Enter search terms or choose filters.
4. Select Apply to narrow records.
5. Use view/action icons in the table to open document details.

Important Notes

- The dashboard only shows records allowed by your role and department access.

8. Upload Documents Page

Screenshot: 8. Upload Documents Page

Purpose

Used to submit one or more documents to the Document Library and approval workflow.

Page Sections

- Select file(s) - drag and drop or browse accepted file types.
- Uploader info - shows current user identity and profile context.
- Document details - document number, revision number, plant, department, and customer/internal option.
- Library path - category, folder, subfolder, customer, or document type based on selected category.
- Revision summary - optional change description for revised documents.
- Submit for Approval - sends the file into pending approval status.

How To Use This Page

1. Select one or more files.
2. Enter document number and revision number.
3. Confirm plant and department.
4. Select customer, or enable Internal Document.
5. Choose the exact Document Library path.
6. Add revision summary if applicable.
7. Select Submit for Approval.

Important Notes

- PDF, Word, Excel, and PowerPoint files are accepted. PDF files are stored directly for preview.

Screenshot: 9. Pending Items Page

Purpose

Lists uploaded documents by approval status and gives approvers access to review actions.

Page Sections

- Status cards - summarize pending, approved, and rejected records.
- Search and status filter - locate documents quickly.
- Export CSV - downloads approval records for review.
- Approval records table - shows document metadata and Review buttons.
- Pagination - controls records per page and navigation.

How To Use This Page

1. Open Pending Items from the sidebar.
2. Filter by status or search text.
3. Review the matching records.
4. Select Review on the document to evaluate.
5. Use export when an offline list is needed.

Important Notes

- Approval visibility depends on role and QMS level.

10. Approval Review Page

Screenshot: 10. Approval Review Page

Purpose

Provides document preview, metadata, and decision controls for approvers.

Page Sections

- Preview panel - displays PDF or supported file previews when available.
- Document details - shows document number, revision, category, uploader, plant, department, customer, and status.
- Decision area - used to approve or reject.
- Comments - required when rejecting and useful for audit clarity.
- Navigation actions - return to previous page or dashboard.

How To Use This Page

1. Open the record from Pending Items.
2. Read the metadata carefully.
3. Preview the file where available.
4. Approve only when the document is correct.
5. Reject with a clear correction note when changes are needed.

Important Notes

- A rejection comment should explain exactly what the uploader must change.

11. Track Approvals Page

Screenshot: 11. Track Approvals Page

Purpose

Shows where documents are in the approval workflow and who has acted or is pending.

Page Sections

- Summary and filters - narrow approval tracking records.
- Mine/All toggle - switches between personal and broader tracking when permitted.
- Tracker card - one document's approval status and metadata.
- Progress bar - visual status of approval completion.
- Stepper - shows upload, first review, final review, approved/rejected states.

How To Use This Page

1. Open Track Approvals.
2. Choose Mine or All if available.
3. Filter by status or search.
4. Read tracker cards and stepper state.
5. Follow up with the pending approver if required.

Important Notes

- Use this page before asking others for status; it is the live workflow trail.

12. Document Library Page

Screenshot: 12. Document Library Page

Purpose

Central browsing area for controlled document categories and folders.

Page Sections

- Category tabs - switch among QMS, CSR, Customer Score Card, Audit NC, Master Records, and related areas.
- Step selector - guides users through access level, folder, customer, or file selection.
- Folder cards - open document groups.
- File grid/list - displays files for the selected path.
- View button - opens available uploaded records.

How To Use This Page

1. Select the relevant category tab.
2. Follow the step cards shown on screen.
3. Open the required folder or customer.
4. Use View to open a file record.
5. Return to category tabs to switch document groups.

Important Notes

- Some categories are filtered by QMS access level.

13. Procedures Page

Screenshot: 13. Procedures Page

Purpose

Provides entry cards for procedure subcategories.

Page Sections

- Procedure cards - Management, Customer, Support, and Plant procedures.
- Category description - explains the type of procedure.
- Browse links - open the selected procedure browser.

How To Use This Page

1. Open Procedures from the sidebar.
2. Choose the procedure type.
3. Select a plant and department in the browser.
4. Open the relevant file list.

Important Notes

- Use the exact procedure type to keep records in the proper folder.

14. Procedure Browser Page

Screenshot: 14. Procedure Browser Page

Purpose

Lets users browse procedure files by plant and department.

Page Sections

- Plant cards - choose the plant group.
- Department folders - appear after plant selection.
- File list modal - lists files in the selected procedure folder.
- View action - logs and opens a file when available.

How To Use This Page

1. Choose a plant.
2. Choose a department.
3. Review the procedure files listed.
4. Select View on the needed file.

Important Notes

- If no files appear, confirm the document was uploaded to this procedure path.

15. Standard Manual And Category Browser Pages

Screenshot: 15. Standard Manual And Category Browser Pages

Purpose

Category browser pages organize special document categories such as Standard Manual, Awards, Certification, CQ Manuals, Business Procedures, and Core Tool Manuals.

Page Sections

- Category header - shows the selected controlled document category.
- Plant selection - opens the plant-specific folder path.
- Department selection - narrows the file list.
- File list - shows documents available for the chosen category path.

How To Use This Page

1. Open the category from the sidebar.
2. Select the relevant plant.
3. Select department or folder.
4. Review and open the needed file.

Important Notes

- Upload category and folder path must match the category browser path for files to appear here.

16. Master Records Page

Screenshot: 16. Master Records Page

Purpose

Displays master document records by plant and department.

Page Sections

- Plant blocks - P1, P2 and P3 group, and P4.
- Department count - shows folders available under each plant.
- Department grid - appears when a plant is opened.
- File modal - opens after selecting a department.

How To Use This Page

1. Open Master Records.
2. Expand the required plant.
3. Select a department folder.
4. Open the file list.
5. Use View where file records are available.

Important Notes

- Master Records focuses on plant and department structure.

17. Customer Records Page

Screenshot: 17. Customer Records Page

Purpose

Groups documents by customer so users can quickly locate customer-related records.

Page Sections

- Customer cards - list official or available customers.
- Selected customer panel - displays files for one customer.
- File cards - show file type, name, and view action.
- Change customer - returns to the customer grid.

How To Use This Page

1. Open Customer Records.
2. Select a customer card.
3. Review the file list.
4. Open the needed file.
5. Return and choose another customer as needed.

Important Notes

- Internal documents appear under Internal instead of a customer.

18. Graphics Report Page

Screenshot: 18. Graphics Report Page

Purpose

Provides document and approval reporting graphics for management review.

Page Sections

- Report summaries - show document activity by status and category.
- Charts/graphics - visualize upload and approval trends.
- Filters - refine visible report information where available.
- Export or review actions - support reporting workflows.

How To Use This Page

1. Open Graphics Report.
2. Review the summary cards and graphics.
3. Apply filters if available.
4. Use report data during reviews or meetings.

Important Notes

- Report values depend on current database records and access level.

19. Revision History Page

Screenshot: 19. Revision History Page

Purpose

Shows document revision records, revised users, dates, and change summaries.

Page Sections

- Filter bar - narrows by plant and department.
- Revision table - lists file, revision, revised by, plant, department, date, and summary.
- Pagination - controls long record lists.

How To Use This Page

1. Open Revision History.
2. Filter by plant or department if needed.
3. Review revision number and change summary.
4. Use the page for audit or change-control checks.

Important Notes

- Revision summaries should be written clearly when uploading revised files.

20. Archive Page

Screenshot: 20. Archive Page

Purpose

Stores deleted or retired documents for audit reference where role access permits.

Page Sections

- Archived records table - shows file, plant, department, customer, uploader, status, and original date.
- Pagination controls - manage long archives.
- Delete/archive actions - available only to authorized users.

How To Use This Page

1. Open Archive.
2. Review records by file name or metadata.
3. Use archive details during investigations or audits.
4. Do not permanently delete records unless authorized.

Important Notes

- Archive actions can affect audit history; handle with care.

21. System Log Page

Screenshot: 21. System Log Page

Purpose

Provides the audit trail for login, upload, approval, view, archive, and profile actions.

Page Sections

- Action filter chips - select the activity type.
- Log table - shows timestamp, user, email/user ID, action, details, and IP address.
- Pagination - controls records per page.

How To Use This Page

1. Open System Log.
2. Choose an action filter or view all.
3. Review details for the event.
4. Use timestamp and user fields for audit tracing.

Important Notes

- System Log is typically for admins and authorized audit users.

22. People Page

Screenshot: 22. People Page

Purpose

Displays user records and role/profile information for users visible to administrators.

Page Sections

- People table/cards - show name, email, user ID, plant, department, and role.
- Role details - help identify approvers and admins.
- Profile images - support user identification.

How To Use This Page

1. Open People from the sidebar.
2. Search visually for the user.
3. Review plant, department, and role.
4. Use the data to confirm approver or admin access.

Important Notes

- Role changes may require database or admin maintenance depending on deployment setup.

23. Profile Page

Screenshot: 23. Profile Page

Purpose

Lets users review account information, upload an avatar, and update password/profile details.

Page Sections

- Profile summary - shows name, role, email, plant, and department.
- Avatar upload - updates profile image.
- Profile information - editable account details where allowed.
- Password section - changes password.
- Recent activity - shows user activity history.

How To Use This Page

1. Open Profile from sidebar or user chip.
2. Review personal and access details.
3. Upload avatar if needed.
4. Update password periodically.
5. Check recent activity for account awareness.

Important Notes

- Use a strong password and sign out after use.

24. About DMS Page

Screenshot: 24. About DMS Page

Purpose

Explains Smart DMS purpose, key modules, and how users should navigate the system.

Page Sections

- Overview section - explains the portal.
- Feature sections - describe upload, approval, tracking, library, and audit capabilities.
- Getting started content - helps new users understand workflow.

How To Use This Page

1. Open About DMS.
2. Review the workflow overview.
3. Use it for onboarding or refresher understanding.
4. Refer new users to this page before training.

Important Notes

- This page is informational and does not change records.

25. About Company Page

Screenshot: 25. About Company Page

Purpose

Provides organization, plant, customer, certification, award, and tool/process reference information.

Page Sections

- Company identity - legal and operational details.
- Division information - business divisions and products.
- Plant cards - plant locations and production focus.
- Customer and certification sections - reference information for users.

How To Use This Page

1. Open About Company.
2. Use plant and division data for document context.
3. Refer to customer and certification information during categorization.
4. Use the page for onboarding and general reference.

Important Notes

- This page is reference-only and should be updated when company information changes.

26. Best Practices

- Always confirm file name, document number, revision number, plant, department, customer, and library path before submitting.
- Use Internal Document only for non-customer documents.
- Use clear revision summaries when replacing or updating controlled files.
- Review the dashboard and library before uploading duplicates.
- Approvers should inspect metadata and preview before deciding.
- Rejection comments must be specific and actionable.
- Use Track Approvals before asking others for status updates.
- Use Revision History and System Log during audits.
- Sign out at the end of each session.

27. Troubleshooting

Issue	Recommended Action
Cannot log in	Check GENID/email and password. Use Forgot password or contact an admin.
Upload button disabled	Select at least one valid file and complete all required metadata and library path fields.
PDF upload issue	PDF files are accepted. If upload fails, confirm file is not open/locked and file size is below 100 MB.
Customer required	Select a customer or mark the file as Internal Document.
File not visible in library	Confirm the upload category, folder, plant, department, and customer match the browser path.
Approval delayed	Open Track Approvals and identify the pending approval step.
Preview unavailable	Confirm the uploaded file exists in uploads and is a supported preview format.

28. Change Control

Update this SOP whenever app navigation, page layout, upload rules, approval workflow, document categories, roles, or audit procedures change.
