

Smart DMS User Manual

This guide is for end users of the current Smart DMS application.

1. Sign in

1. Open the application in your browser.
2. Enter your email address or employee ID and password.
3. Click Sign In.
4. If you forget your password, use the Forgot Password link.

2. Use the dashboard

After signing in, the dashboard shows your available documents.

Use it to:

search for documents
filter by plant, department, customer, or status
view approval status
bookmark important records
open recently viewed documents

3. Upload a document

1. Open the Upload page.
2. Choose the plant and department.
3. Enter the document number and revision number.
4. Select the correct category and library folder path.
5. Choose the file(s) to upload.
6. Submit the form.

Uploaded documents are saved and sent to approval.

4. Review approvals

If you are an approver, go to the Approvals page to review pending items.

You can:

see the document metadata
preview the document
approve or reject it
add comments when rejecting

5. Work with the document library

The document library helps users browse reference documents by category and folder.

Use it to quickly find procedures, manuals, and other stored documents.

6. Browse procedures and records

The Procedures section organizes procedure documents by category.

The Plant Assets and Customer Records pages help users browse information grouped by plant/department or customer.

7. Track updates and notifications

Use the tracking page to follow the progress of submissions.

Notifications help you stay informed about approvals and system updates.

8. Best practices

Use clear document numbers and revision numbers.

Choose the correct category and folder path before upload.

Check plant, department, and customer values carefully.

Contact the administrator for access issues or approval questions.

Support

For sign-in issues, upload problems, or approval questions, contact the DMS administrator or your team lead.
